

URGE LABS & MBR TO REHOME RATHER THAN KILL UNWANTED BEAGLES

PLEASE SIGN THE PETITION.

Currently, laboratories that use Beagles in their tests, or breeders that breed Beagles for the labs, are required by law to have a rehome policy in place in order to be granted a license.

What happens though, is that the 'no longer of use' dogs are always euthanised rather than rehomed.

MBR Acres breed 7,000 dogs a year for laboratories for torturous testing at these establishments, *that's 7,000 dogs a year at £7,000 each that we know they charge the labs = £49,000,000... no wonder they don't want to stop this evil trade! IT'S ALL ABOUT THE MONEY!*
